## D-29410 Salzwedel

KRAIBURG Relastec GmbH & Co. KG is an independent enterprise in the KRAIBURG-Holding. The company supplies the international market with ready-to-install products for acoustic and vibration insulation (DAMTEC®), impact protection (EUROFLEX®), structural protection and transport protection (KRAITEC®), sports floor coverings and elastic layers (SPORTEC®) as well as elastic flooring systems for horse farms and riding facilities (KOMFORTEX®).

In a long line of rubber recycling companies, KRAIBURG Relastec is one of the most important world-wide.

- Sports flooring for fitness and weight lifting
- Sports flooring for indoor and outdoor sports
- Commercial flooring

- Impact protection slabs for playgrounds
- Playground accessories
- Borders

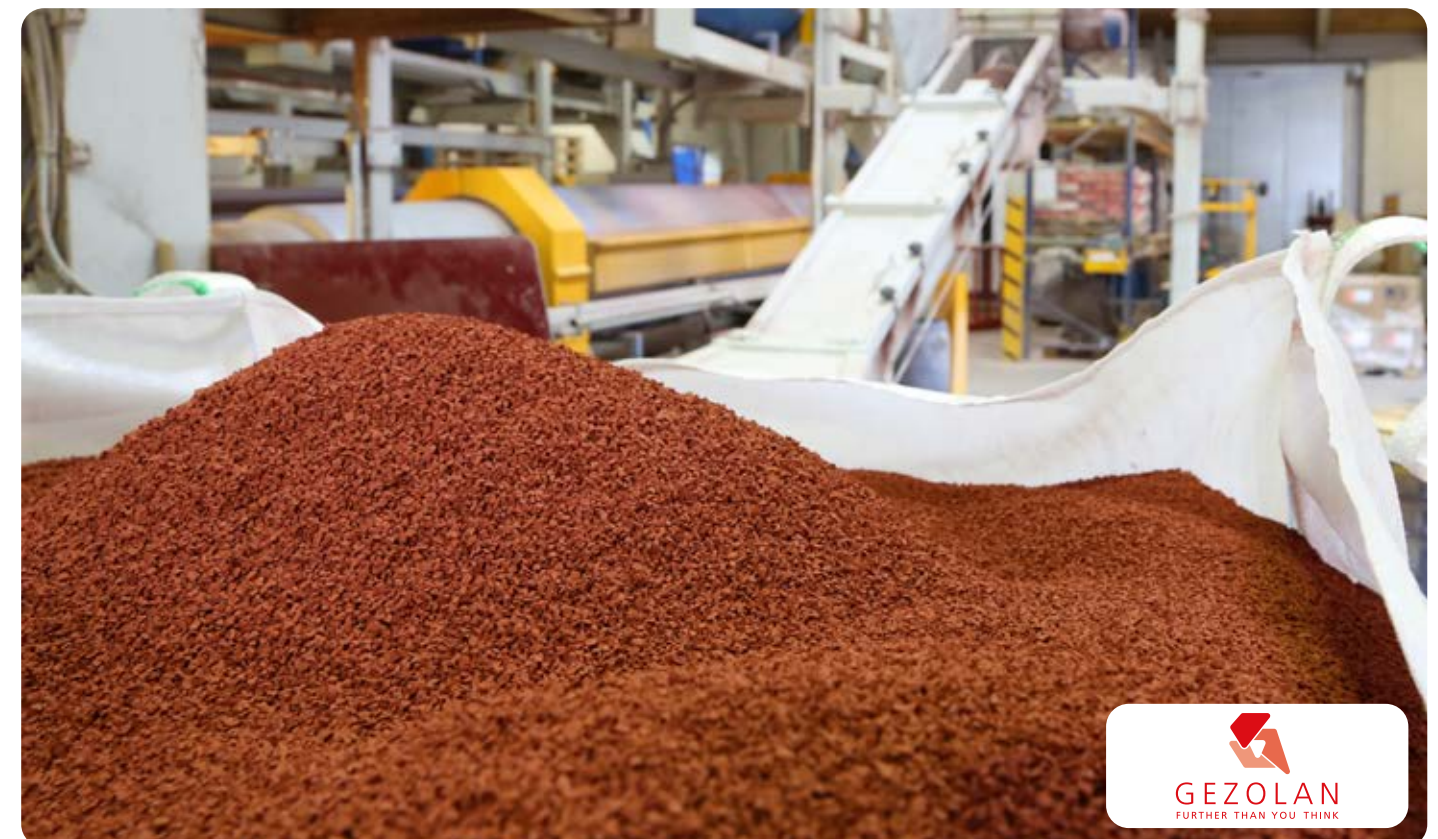

## CH-6252 Dagmersellen

For more than 50 years, GEZOLAN AG has been the world's leading quality specialist for innovative and environmentally compatible granule solutions for sports and leisure flooring. As a member of the international acting KRAIBURG Group, GEZOLAN has earned a worldwide reputation as a pioneer in the manufacture of EPDM granules. Using specially in-house developed manufacturing processes, GEZOLAN produces a variety of rubber granules of the highest quality, making it a reliable partner and supplier for companies specialising in the installation of sports and leisure surfacing projects and playgrounds.

EPDM rubber granules for

- Athletics tracks
- Multipurpose areas
- Seamless impact protection systems
- Impact protection slabs and moulded parts
- Artificial turf systems

## Flooring solutions for playgrounds

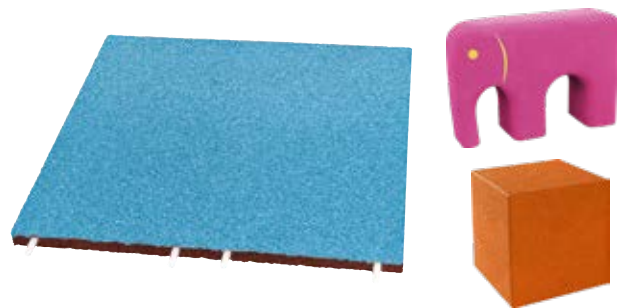

**EUROFLEX®**

### Impact Protection Slabs

EUROFLEX® rubber slabs guarantee the highest safety standard on playgrounds – for the past 40 years.

Impact protection slabs are available in various designs, for example with single or multi-coloured EPDM surface (consisting of GEZOFLEX® EPDM granulate). EUROFLEX® impact protection slabs guarantee fall heights of up to 3.0 m and are TÜV-certified. They are quick and easy to install in all weather conditions and can easily be exchanged.

A comprehensive range of playground accessories consisting of animals, balls, cubes, mushrooms and interactive games perfectly complements the range of impact protection slabs.

Further information is available in the EUROFLEX® brochure or at [www.kraiburg-relastec.com](http://www.kraiburg-relastec.com)

**GEZOFLEX**  
EPDM FOR SYNTHETIC FLOORING

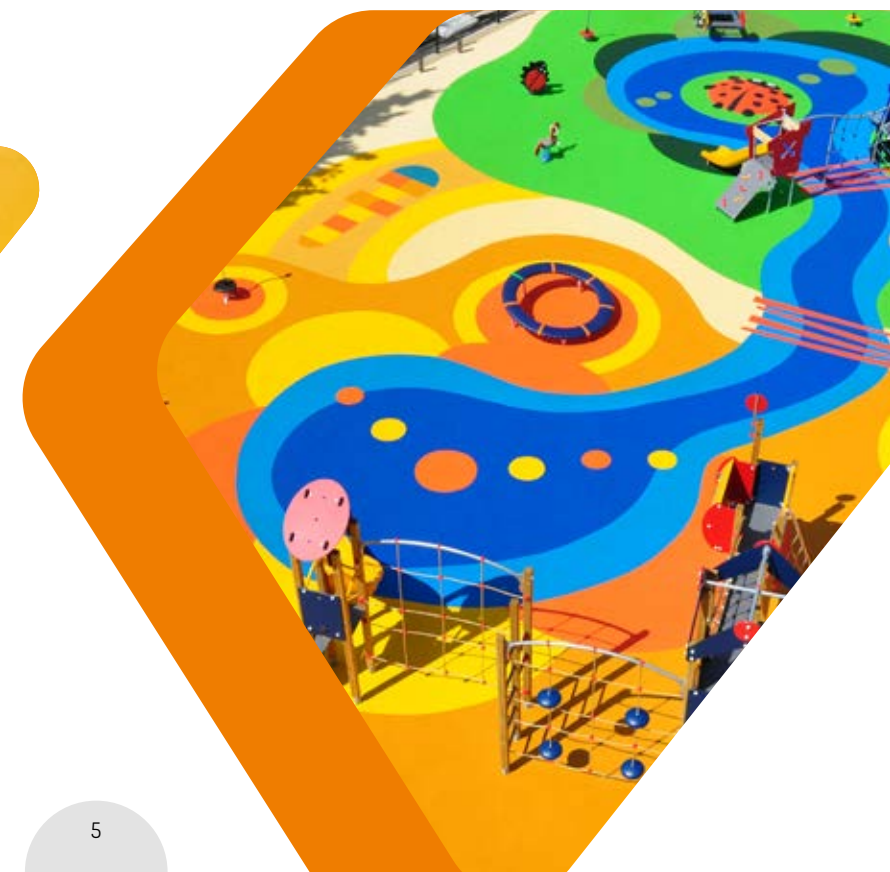

### EPDM granules for seamless floorings

In addition to being used as a surface on EUROFLEX® Impact Protection Slabs or playground accessories, GEZOFLEX® EPDM granules can be installed in combination with a suitable polyurethane binder to form a seamless rubber surfacing with safety properties. On playgrounds, for example, they ensure optimum impact protection properties. Installation is carried out on site by experienced installation companies.

The high-quality, dust-free EPDM rubber granules from GEZOLAN are characterised by their high elasticity, long color fastness and good UV and color resistance. Optimised product properties also make them easy to work with.

Further information is available in the GEZOFLEX® brochure or at [www.gezolan.com](http://www.gezolan.com)

## Flooring solutions for fitness, multipurpose areas and tracks

**SPORTEC®**

### Rolls and tiles

#### Applications

#### Advantages/properties

The SPORTEC® UNI versa series, purcolor & variant consist of 100% EPDM granulate from GEZOLAN. The products have high ball rebound characteristics, high comfort due to elasticity and high weather resistance. They also achieve the high fire protection class C<sub>fl</sub>-s1, which makes them suitable for indoor use.

Further information is available in the SPORTEC® brochure or at [www.kraiburg-relastec.com](http://www.kraiburg-relastec.com)

**GEZOFLEX**  
EPDM FOR SYNTHETIC FLOORING

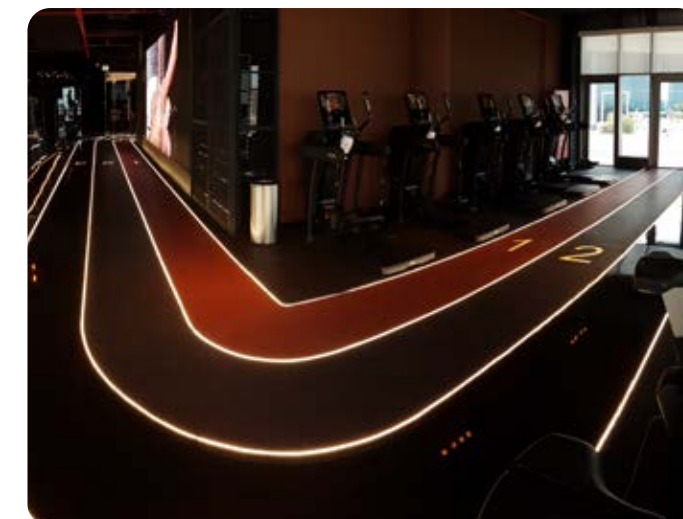

### EPDM granules for seamless floorings

In addition to being used for SPORTEC® roll goods, GEZOFLEX® EPDM granules can be used in combination with a suitable polyurethane binder to create a jointless synthetic floor covering with the desired properties. As multipurpose surfaces or running tracks, they offer optimum functional properties and are the basis for top sporting performance. Installation is carried out on site by experienced installation companies.

The high-quality, dust-free EPDM rubber granules from GEZOLAN are characterised by their high elasticity, long color fastness and good UV and color resistance. Optimised product properties also make them easy to work with.

Further information is available in the GEZOFLEX® brochure or at [www.gezolan.com](http://www.gezolan.com)
